Framework experience   ● ● ● ● ●
React, NextJS, VueJS, Flask, Tauri

Database experience   ● ● ● ● ●
MySQL, SQLite, MongoDB

Game engine experience   ● ● ● ○ ○
Unreal Engine 5, Unity

💼 Professional Experience

Nijdeken, *Head Developer*   05/2021 – present
Hengelo, Netherlands
During my tenure at Nijdeken, I spearheaded the development of their new
website, showcasing my proficiency in web development. Additionally, I
played a key role in leveraging and programming robotic systems for
various projects. My responsibilities included developing and implementing
code to enhance the functionality and performance of these robots.
Additionally, I designed user interface (UI) components tailored to the
specific needs of these robotic applications, ensuring seamless user
interaction.

Freelancer   08/2016 – present
For an extensive period, and continuing to the present, I have engaged in
freelancing, undertaking diverse projects that span from website
development to applications and beyond.
